DATA ENGINEER

Data Engineer with 5+ years delivering enterprise data solutions across Snowflake, SQL Server, and Azure in regulated environments. Translate executive and director-level priorities into data models, technical requirements, validation plans, and release-ready solutions. Lead distributed engineering delivery while remaining hands-on in solution architecture, complex SQL debugging, restricted-data QA, and Snowflake Cortex Agent development.

EXPERIENCE

Data Engineer II

August 2024 – Current

Honeywell Aerospace

Phoenix, AZ

- Lead data delivery for executive-facing analytics initiatives, partnering with directors, senior directors, and cross-functional teams to define metrics, resolve ambiguity, and translate leadership needs into Snowflake solutions
- Co-design greenfield data models and solution architecture for an Executive Cockpit with the enterprise data architect, defining source mappings, business logic, data grain, and acceptance criteria before development handoff.
- Build and iterate a Snowflake Cortex Agent for the Executive Cockpit, connecting governed EDW data so leaders can ask natural-language questions alongside dashboard analysis.
- Direct delivery across a distributed offshore engineering team by converting business requirements into technical stories, clarifying implementation logic, reviewing results, resolving blockers, and coordinating release readiness.
- Serve as the restricted-data validation authority for QA and production: execute workflows, validate outputs, diagnose duplicate or missing values in SQL definitions spanning thousands of lines, and provide code-level remediation guidance.
- Present solution direction, delivery status, risks, and data-quality findings to director- and VP-level stakeholders, aligning business expectations with architecture and engineering constraints

Data Engineer I

March 2022 – July 2024

ASU Enterprise Partners

Tempe, AZ

- Modernized ETL/ELT workflows with SSIS, Azure Data Factory, and SQL Server, integrating Salesforce, Workday, and Azure Blob Storage into the enterprise data warehouse.
- Built stored procedures and data-quality routines that automated Power BI refreshes, resolved duplicate records, improved reporting reliability, and reduced complex DAX dependencies.

Technical Solution Analyst

February 2021 – March 2022

Oracle - Cerner Corporation

Kansas City, MO

- Resolved high-volume production data and application issues using Oracle SQL, logs, and monitoring while sustaining 90%+ client satisfaction and meeting healthcare SLAs.
- Partnered with client and engineering teams to investigate data-integrity failures, perform safe SQL updates, and stabilize data flows in 24/7 healthcare environments.

PROJECT

Founder / Full-Stack AI Product Engineer

April 2026 - Current

Personal Project - MelodyMap.ai

- Designing an AI-assisted workflow platform that reduces planning and documentation work for music therapists through calendar context, reusable location profiles, structured session plans, debriefs, and mileage tracking.
- Architected a layered system with Next.js, FastAPI, PostgreSQL, and Gemini through a server-side model gateway, with structured outputs, auditability, and privacy-conscious data boundaries.

SKILLS

- **Data:** Snowflake, SQL, Data Modeling, ETL/ELT, Data Warehousing, SQL Server, Informatica, Control-M, Azure Data Factory, SSIS, Power BI
- **AI & Engineering:** Snowflake Cortex Agents, Python, Git, React, Next.js, FastAPI, PostgreSQL, Gemini, Claude, Codex
- **Leadership:** Solution Architecture, Executive Stakeholder Communication, Distributed Delivery, Requirements Translation, QA and Data Validation
- **Spoken Languages:** English (Native), Korean (Native)

EDUCATION

Arizona State University, W. P. Carey School of Business – M.S. in Business Analytics

August 2023 – December 2024

Arizona State University – B.S. in Computer Information Systems

August 2016 – December 2020
