

TECHNICAL PRODUCT MANAGER / DATA PRODUCT MANAGER

Technical product leader with a data engineering background and 6+ years of experience translating ambiguous business needs into scoped requirements, Jira-ready work items, QA plans, and release-ready deliverables. Experienced partnering with business stakeholders, engineers, offshore teams, and leadership across enterprise data platforms, AI-assisted workflows, and internal data products.

EXPERIENCE

Data Engineer II

Honeywell

August 2024 – Current

Phoenix, AZ

- Partner with director-level stakeholders, business users, technical leads, and a 10-person offshore engineering team to translate enterprise data requirements into mapping documents, Jira-ready work items, acceptance criteria, QA steps, and release deliverables.
- Manage cross-functional delivery for multi-month data initiatives, tracking scope, dependencies, blockers, timelines, and release readiness across business, engineering, QA, and offshore teams to improve delivery visibility and execution discipline.
- Communicate technical tradeoffs, data-quality risks, and delivery status to leadership in business terms, helping stakeholders make informed decisions on scope, priority, production readiness, and downstream business impact.
- Inherited an at-risk data model initiative with 3 months remaining before deadline; broke ambiguous requirements into actionable tasks, coordinated 3 offshore developers, contributed hands-on SQL development, and recovered delivery by the original deadline.
- Led an AI-assisted column lineage initiative across 9,000+ Snowflake objects using Snowflake native LLM functions and Claude via GitHub Copilot, reaching ~80% automated lineage accuracy and reducing months of manual documentation into weeks.

Data Engineer I

ASU Enterprise Partners

March 2022 – July 2024

Tempe, AZ

- Owned end-to-end delivery of reporting and data model updates in a lean production environment, gathering stakeholder requirements, defining SQL logic changes, validating outputs, and supporting production release.
- Translated business reporting gaps into actionable SQL, ETL, and dashboard updates across SQL Server, Azure Data Factory, SSIS, Salesforce, Workday, and Power BI, improving reporting reliability and reducing manual follow-up.
- Coordinated with business users and technical teams to troubleshoot production data issues, review impact, communicate status, and confirm release readiness before and after deployment.

Technical Solution Analyst

Oracle - Cerner Corporation

February 2021 – March 2022

Kansas City, MO

- Served as a client-facing technical liaison for healthcare application issues, translating end-user problems into SQL investigations, root-cause analysis, and resolution plans under SLA pressure.
- Explained technical findings, data issues, and remediation steps to non-technical clients and internal teams while supporting high-priority incidents affecting patient care workflows and maintaining 90%+ client satisfaction.

PROJECT

Founder / Technical Product Manager & Full-Stack AI Product Engineer

Personal Project - MelodyMap.ai

April 2026 - Current

- Founded MelodyMap.ai, an AI-assisted SaaS product for music therapists, after identifying recurring pain points around unpaid session planning, documentation, song selection, and follow-up workflows.
- Defined the MVP, roadmap, user workflows, and product requirements across calendar context, location memory, session planning, debriefs, reports, mileage capture, and AI-assisted recommendations.
- Translated therapist needs into actionable product flows, database models, API requirements, review states, and safe AI interaction patterns for a full-stack product built with Next.js, FastAPI, PostgreSQL, Celery, Redis, Stripe, and Gemini.
- Designed responsible AI workflow behavior with therapist control, confidence/caveat handling, prompt-minimized context, and backend-only LLM orchestration to support clinical-adjacent planning use cases.

SKILLS

- **Product & Delivery:** Product Requirements, Roadmap Planning, Jira, Sprint Planning, Backlog Prioritization, Acceptance Criteria, Stakeholder Alignment, Executive Communication, QA Planning, Release Readiness
- **AI & Data Products:** LLM-Assisted Workflows, AI Product Design, Data Lineage, Data Governance, Self-Service Analytics
- **Technical:** SQL, Python, Snowflake, Azure, SQL Server, Power BI, ETL/ELT, Data Modeling, React, PostgreSQL, GitHub
- **Spoken Languages:** English (Native), Korean (Native)

EDUCATION

Arizona State University, W. P. Carey School of Business – M.S. in Business Analytics

August 2023 – December 2024

Arizona State University – B.S. in Computer Information Systems

August 2016 – December 2020
