

DATA ENGINEER

AI-focused Data Engineer with 5+ years across enterprise data systems, production troubleshooting, and analytics tooling; 4+ years building ETL/ELT pipelines and data models with SQL. Experienced creating metric-ready datasets, lineage/impact analysis, data quality controls, and internal tools across Snowflake, SQL Server, Azure, and React. Strong background fusing multiple data sources, leading root-cause investigations, and delivering reliable systems in fast-changing, regulated environments.

EXPERIENCE

Data Engineer II

Honeywell

August 2024 – Current

Phoenix, AZ

- Engineer and maintain SQL-based transformation logic across a Snowflake Enterprise Data Warehouse serving 100K+ employees, managing PB scale of data models and processing 10M+ row government datasets under strict compliance requirements.
- Develop, validate, and deploy SQL definitions based on evolving business requirements, coordinating with a 10-person offshore team across the full SDLC — including code reviews, QA validation on restricted government data, and sprint delivery.
- Serve as the primary technical liaison between business clients and engineering, translating stakeholder requests into data logic changes and directly communicating with directors on deliverables, timelines, and data quality.
- Spearhead an AI-driven column lineage initiative across 9,000+ Snowflake objects by combining Snowflake's native LLM functions with Claude Opus 4.6 (via GitHub Copilot), achieving 80% accuracy on automated column-level lineage mapping — reducing what would have been months of manual documentation to weeks.
- Architect and prototype an internal data lineage visualization tool using React, delivering an Atlan-like interactive flow diagram that demonstrate the feasibility of in-house data catalog tooling for enterprise leadership.
- Lead the design of a semantic layer and table/column lineage framework for the Enterprise Data Warehouse.

Data Engineer I

ASU Enterprise Partners

March 2022 – July 2024

Tempe, AZ

- Automated and migrated ETL/ELT pipelines using SSIS, Azure Data Factory, and SQL Server, integrating data from Salesforce, Workday, and Azure Blob Storage into the enterprise data warehouse.
- Developed SQL Server stored procedures to automate Power BI dashboard updates and implemented data deduplication routines, improving reporting accuracy and reducing DAX complexity.

Technical Solution Analyst

Oracle - Cerner Corporation

February 2021 – March 2022

Kansas City, MO

- Investigated and resolved complex front-end and backend data issues across enterprise applications using SQL, log analysis, and proactive Oracle-based monitoring—maintaining 90%+ client satisfaction while meeting SLAs.
- Collaborated cross-functionally to troubleshoot data integrity problems, perform safe SQL updates, and stabilize data flows across systems and teams.

PROJECT

Founder / Full-Stack AI Product Engineer

Personal Project - MelodyMap.ai

April 2026 - Current

- Building MelodyMap.ai, an AI-assisted SaaS platform that helps music therapists plan recurring sessions, capture debriefs, and generate report-ready documentation. One-off planning into a memory loop that improves future sessions based on past outcomes.
- Architecting the full-stack system with Next.js, TypeScript, FastAPI, PostgreSQL, Celery, Redis, Stripe, and Gemini through a backend-only model gateway. Designing APIs, database models, and workflows for sessions, locations, plans, songs, and reports.
- Developing a song-aware recommendation system that uses location profiles, population, theme, therapist repertoire, chart familiarity, and prior session outcomes. Recommendations include confidence levels, caveats, review states, and therapist options.
- Building population-aware planning and reporting support for all ages, hospice, veterans, and community groups.

SKILLS

- **AI & LLM:** Multi-Agent Orchestration, Prompt Engineering, LLM-Assisted Development, Codex, Claude, GitHub Copilot, Ollama
- **Languages:** SQL, Python, JavaScript, HTML/CSS, Linux/Bash
- **Data Engineering:** Snowflake, Informatica, Control-M, SSIS, SQL Server, Power BI, ETL/ELT, Data Modeling, Data Warehousing
- **Platforms & Tools:** Azure, Supabase, Salesforce, GitHub, React
- **Spoken Languages:** English (Native), Korean (Native)

EDUCATION

Arizona State University, W. P. Carey School of Business – M.S. in Business Analytics

August 2023 – December 2024

Arizona State University – B.S. in Computer Information Systems

August 2016 – December 2020
