DATA ENGINEER | SNOWFLAKE | DATA ARCHITECTURE & DELIVERY

Data Engineer with 5+ years delivering governed Snowflake, SQL Server, and Azure data solutions in regulated enterprise environments. Lead executive-facing initiatives from ambiguous business requirements through data architecture, distributed development, QA, UAT, and production readiness. Combine complex SQL debugging, performance optimization, and applied Snowflake AI to deliver reliable analytics and accelerate technical delivery.

EXPERIENCE

Data Engineer II

August 2024 – Current

Honeywell Aerospace

Phoenix, AZ

- Reduced the full-load runtime of a multi-layer Snowflake pipeline supporting a 10M+ row, 200+ column data model from up to three hours to 30 minutes, an 83% runtime reduction, by replacing expensive nested-view dependencies, removing unnecessary joins and CTEs, and limiting transformations to required columns.
- Lead technical delivery for executive-facing analytics initiatives, partnering directly with directors, senior leaders, finance, supply chain, and EDW teams to translate ambiguous business priorities into governed Snowflake solutions.
- Co-design the greenfield EDW architecture and data model for Executive Cockpit with the enterprise data architect, defining source mappings, business logic, grain, acceptance criteria, and phased ingestion requirements.
- Coordinate delivery across global engineering workstreams, typically guiding 2–5 engineers per initiative through designated DE leads and supporting concurrent projects across a broader pool of approximately 12 engineers.
- Serve as a primary restricted-data QA validation partner for global engineers without environment access, executing workflows, diagnosing duplicates and missing values, and coordinating release readiness across 20+ enterprise data models, with deep ownership of three complex finance, purchasing, and operational models.
- Developed a Snowflake Cortex Agent prototype for technical metadata automation that generates business definitions and source-to-target lineage for hundreds of columns, achieving approximately 90% mapping accuracy in initial testing and reducing draft preparation time from 4+ hours to minutes.

Data Engineer I

March 2022 – July 2024

ASU Enterprise Partners

Tempe, AZ

- Modernized enterprise ETL/ELT pipelines across Salesforce, Workday, and Azure Blob Storage using SSIS, Azure Data Factory, and SQL Server, centralizing cross-system data for analytics and reporting.
- Developed SQL Server stored procedures and automated data-quality checks that resolved duplicate records, improved Power BI refresh reliability, and replaced complex report-level DAX with governed warehouse logic.

Technical Solution Analyst

February 2021 – March 2022

Oracle - Cerner Corporation

Kansas City, MO

- Resolved high-volume production data and application issues using Oracle SQL, logs, and monitoring while sustaining 90%+ client satisfaction and meeting healthcare SLAs.
- Partnered with client and engineering teams to investigate data-integrity failures, perform safe SQL updates, and stabilize data flows in 24/7 healthcare environments.

PROJECT

Founder

April 2026 - Current

Personal Project - MelodyMap.ai – qa.MelodyMap.ai

- Designing an AI-assisted workflow platform that reduces planning and documentation work for music therapists through calendar context, reusable location profiles, structured session plans, debriefs, and mileage tracking.
- Architected a layered system with Next.js, FastAPI, PostgreSQL, and Gemini through a server-side model gateway, with structured outputs, auditability, and privacy-conscious data boundaries.

SKILLS

- **Data:** Snowflake, SQL, Data Modeling, ETL/ELT, Data Warehousing, SQL Server, Informatica, Control-M, Azure Data Factory, SSIS, Power BI
- **Engineering Practices:** SQL Performance Tuning, Data Quality, Source-to-Target Mapping, Data Lineage, Git
- **Applied AI:** Snowflake Cortex Agents, Gemini, AI-Assisted Product Development
- **Leadership:** Solution Architecture, Executive Stakeholder Communication, Distributed Delivery, Requirements Translation, QA and Data Validation
- **Spoken Languages:** English and Korean — Native/Bilingual Proficiency

EDUCATION

Arizona State University, W. P. Carey School of Business – M.S. in Business Analytics

August 2023 – December 2024

Arizona State University – B.S. in Computer Information Systems

August 2016 – December 2020
